- The Adani Foundation has empowered over 9.1 million lives with impactful health, nutrition, education, basic sanitation, women's livelihood and skills development efforts aligned with the aspirations of new India.

- The Adani Portfolio plays a pivotal role in advancing India's decarbonisation goals. The Group has pledged to invest USD 100 billion over the next decade to support the green transition. Significant strides have been made by the companies within the portfolio to accelerate their decarbonisation efforts, with the aim of achieving Net Zero emissions by 2070 or earlier, in alignment with India's Net Zero ambitions.
  - To reduce Scope 1 emissions, the Adani Portfolio is enhancing operational efficiency, electrifying operations wherever possible, adopting biofuels, and piloting hydrogen fuel cells where other options are not feasible.
  - The Portfolio's significant renewable capacity, currently at 14.2 GW and projected to reach 50 GW by 2030, helps reduce Scope 2 emissions by sourcing green electricity.
  - The Portfolio of Companies are also exploring waste heat recovery and energy storage solutions, including utility-scale batteries and green hydrogen for continuous green electricity.
  - To abate Scope 3 emissions, Adani Portfolio businesses are adopting circular economy measures and exploring options to incentivise upstream and downstream stakeholders to reduce their emissions by offering price premiums for low-carbon products and services.
  - The pathway for decarbonising the last mile focusses on the creation of an integrated green hydrogen ecosystem, the adoption of sustainable energy storage solutions, the exploration of carbon capture and utilisation (CCU) opportunities, the establishment of a carbon pricing mechanism, and the implementation of pilot projects aimed at reducing hard-to-abate greenhouse gas emissions.
