Adani Green has in place 'Land procurement policy' which ensures a structured and transparent approach to land acquisition facilitating smooth development and operation while adhering to legal and regulatory requirements. Our land acquisition procedure is based on a willing buyer-seller agreement. Furthermore, with stakeholder consultation and good faith land price negotiation, a checklist for land procurement is prepared considering environmental and local social impact. We also practice a lease system for renting land across all our operations where the lease rental is 20-25% of the value of the land, allowing landowners to benefit in the process. Wastelands are prioritised for the development of solar, wind or hybrid power plants.

3. Describe the mechanisms to receive and redress grievances of the community

Adani Green has implemented SOP on Community Grievance Management for redressing grievances received from the local communities residing near our sites. The indicative key areas for grievances are well defined in the SOP. All communities that may be impacted directly or indirectly by our operations are privy to this process. According to the procedure, a grievance register is maintained at the entry gate of each project and site which is easily made accessible where all grievances can be raised anonymously and are confidential. The Community Grievance Redressal Committee (CGRC) meets within a week of receipt of the grievance. Relevant grievances received are well investigated, verified, and resolved within two weeks of receiving the complaint. The mechanism is communicated to all communities and is part of our project screening, impact assessment, and operations stages.
